Trading for over 30 years, GRP Buildings Products is equipped to meet the needs of architects and builders, whether the project involves a one off bespoke piece or a large manufacturing run. We offer a complete service from design to manufacture.

WHY USE GRP?

GRP (fibreglass) is the ideal material for producing items where durability, flexibility of design and a lightweight product is required

We specialise in high quality replication of finishes and the use of specialist materials to reduce downtime and architectural issues. Our tough yet lightweight products are built to last. Tests by industry experts RAPRA Limited have led to our brick and stone cladding being accredited with a 10 year guarantee.

Finishes include: Brick, Slate, Oak/Timber, Brass, Lead, Zinc, Bronze, Natural or Reconditioned stone, Roughcast render, Tyrolean/Smooth render, Granada stone & ceramic tile

“An industry report by the DTI and BRE suggests a GRP lifespan of 60 to 100 years”
