CHIMNEY SPECIFICATION

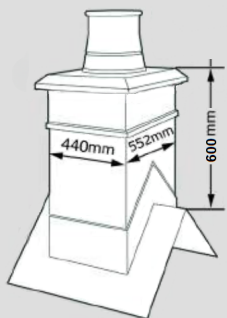

Each chimney can be tailored as much or as little as required to meet your needs - we can match the pitch, the texture, the colour, the pots and the capping to suit your build. Our value for money developer range is made up of three stock designs - the Napley, Kenley and Shalford. For each of these you can specify the brick/stone, pot and capping details to match your development.

NAPLEY

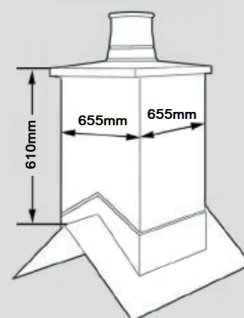

KENLEY

NAPLEY

A compact but attractive unit, the Napley chimney is the smallest in the range and is now available in a recon stone finish as well as brick and render effects. The example above shows the Napley chimney finished in a red creased brick with a Bathstone stone effect capping.

KENLEY

The most popular unit in the range, the 655mm square Kenley can be offered in 3 different brick textures and also is available in natural or reconstituted stone effects as well as a smooth render effect. The example above shows the Kenley chimney finished in a red stock brick with a Bathstone stone effect capping.

✓ REALISTIC ✓ COST EFFECTIVE ✓ VALUE ADDING

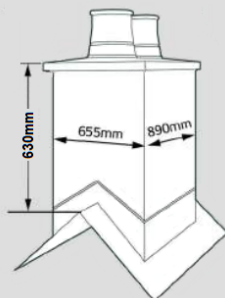

✓ QUICK & EASY INSTALL ✓ STRONG & WEATHERPROOF

✓ LIMITLESS VARIATIONS

SHALFORD

SHALFORD

The largest chimney in the range, our Shalford can sit with the wider side sitting perpendicular or parallel to the roof ridge and is available with single or double pots. The example above shows the Shalford chimney finished in a buff creased brick with a Bathstone stone effect capping.

FINISHES

The Litestack Chimney range includes stone and render finishes in addition to our familiar brick chimneys. As with our brick finishes, each chimney can be carefully matched to the materials to be used on your particular project.

NATURAL STONE

SMOOTH RENDER

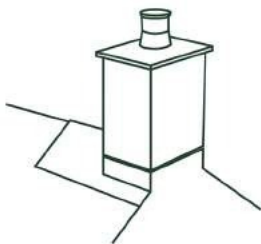

RE-CON STONE

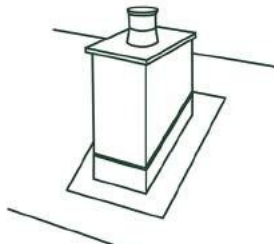

ROUGHCAST RENDER

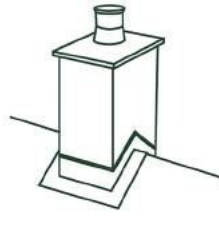

Each chimney is available in end ridge, mono pitch or mid ridge format. The option is available to pre-lead your chimney to enable even more rapid installation.

End Ridge

Mono Pitch

Mid Ridge

Factory-fitted customer supplied flue kits can be installed to provide live chimneys which are suitable for Class 1 applications.

INSTALLATION

Each Litestack chimney is supplied with a complete fixing kit and detailed fitting instructions. The chimneys can be installed immediately after the rafters are in place using a telescopic forklift or a light crane.
