

## ARCHITECTURAL FEATURES

Our lightweight features are designed to add character and kerb appeal to new-build or existing properties.

Created to replicate traditional stone & brick finishes, we can offer a standard range of colours or alternatively provide a colour-matching service.

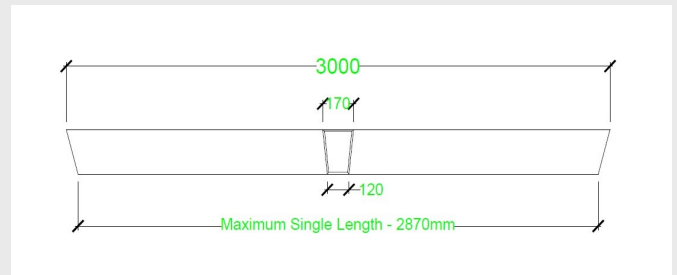

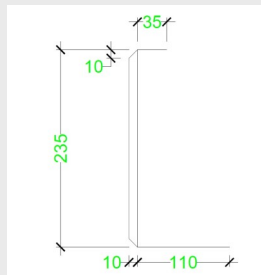

Installation is simple and clean, with no need for wet trades.

Products can be delivered on a 'just in time' basis on new developments and retrofitted to renovations and restorations.

Our specialist team can offer bespoke solutions to architectural specifications where required, please drop us an email or give us a call to discuss further.
